Top 20 of KEGG Enrichment

Glycolysis / Gluconeogenesis
Aminoacyl-tRNA biosynthesis
Protein processing in endoplasmic reticulum
Methane metabolism
Biosynthesis of secondary metabolites
Taurine and hypotaurine metabolism
Longevity regulating pathway - multiple species
Fatty acid biosynthesis
Pyruvate metabolism
Cysteine and methionine metabolism
Hippo signaling pathway - multiple species
Starch and sucrose metabolism
Porphyrin metabolism
Arginine biosynthesis
Fatty acid metabolism
Nitrogen metabolism
Ribosome biogenesis in eukaryotes
Metabolic pathways
Citrate cycle (TCA cycle)
Steroid biosynthesis
